

ETON COLLEGE WOTTON HOUSE, BOARDING HOUSE EXTENSION AND FULL REFURBISHMENT

- A major internal refurbishment of the Wotton house building, internally and externally
- The project included asbestos removal, structural reshaping, and roof repairs, with new flooring, a modern lift, and updated mechanical and electrical systems including plant room refit
- Fire safety upgrades, new staircases, and luxurious bathroom renovations have elevated the interior, while restored windows and modernised kitchens add to the charm giving the building a fresh, contemporary feel
- Striking extensions and exterior remodelling bring the vision to life, complemented by landscaped grounds. Even the sports court has been renewed with a new roof and repairs
- This is more than a renovation—it's a complete revival that blends heritage with modernity

"I would like to put on record my appreciation for the cooperation, application, endeavour and quality LST have displayed on this contract in spite of unprecedented obstacles being placed in the way, and all undertaken with utmost courtesy and in a spirit of helpfulness. It has been a pleasure working with you."
