

BISHOPSGATE SCHOOL NEW SPORTS HALL

- LST was appointed to design and build a two-storey sports hall featuring four badminton courts, a climbing wall, gym, multi-purpose studio, storage areas, changing facilities, and toilets. The project also includes a first-floor viewing balcony and an open-plan foyer at the entrance
- Outside, LST was responsible for the landscaping around the building, which was designed to be in keeping with the rest of the school grounds
- A large part of the contract was delivered while the school remained open, so we had to make sure that children and staff were kept safe and any potential disruption was minimised
- Careful planning and communication was required to ensure the safe movement of construction vehicles, whilst also considering the needs of the local residents
- The 12-month project was completed throughout lockdown and handed over in time for the new school year in September 2020
