

Meet your cloud objectives

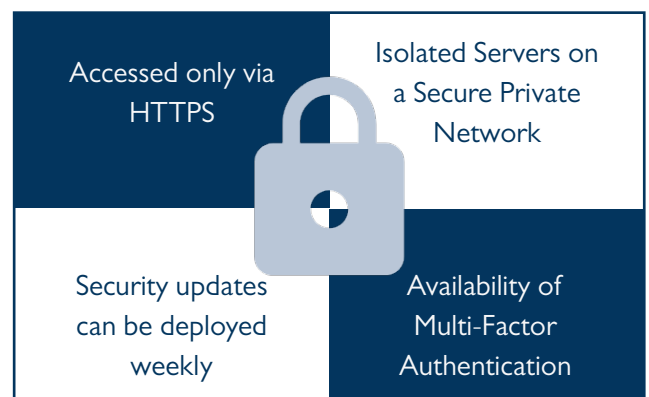

passFINANCE and 3sysACADEMIC in the cloud

PASS-hosted provides a highly secure platform based in the UK and available via a browser worldwide.

With the PASS-hosted solution WCBS can host your passFINANCE or 3sysACADEMIC data on our cloud-based servers, which we manage for you. This gives you remote access to your software whilst removing the strain of managing your physical servers.

PASS-hosted is enabled with WCBS partner MIS Hosting (part of the MIS Group), with whom we have a long-standing partnership. The platform is globally accessible, and the data residency of the infrastructure is kept within the United Kingdom.

A highly secure platform

We provide a secure, browser-based experience for accessing your software, allowing passFINANCE and 3sysACADEMIC to run seamlessly across a wide range of devices. The hosting experience can only be accessed via HTTPS, and security updates are deployed on a weekly basis depending on their status. Each server is isolated to only allow specific traffic, and hosted on a secure private network.

Save money and time

You no longer need to maintain and upgrade expensive servers, we manage the cloud servers and software versions so you will always be up to date. You will also save on Microsoft licensing costs.

How we keep your data safe

Uptime Target

WCBS targets 99.95% for uptime which is measured over a month.

Multi-Factor Authentication

Additional security is available via Multi-Factor Authentication (MFA) with apps such as Microsoft Authenticator or Google Authenticator to login with a one-time passcode (OTP).

Accredited Datacentre

ISO27001 | BS: 5975

Our hosting partners own all the hardware in the datacentre which has ISO:27001 and BS:5979 accreditations.

Daily Database & Server Backups

Databases are backed up daily on a 7-day retention. Servers have snapshots taken daily and retained on a rolling 28 day cycle.

UK Data Residency

PASS-hosted is located in a datacentre in Manchester, UK. The datacentre has 24/7 manned security with swipe card, retina entry controls and access is only permitted by prior arrangement.

Globally Accessible

The platform is globally accessible, 24/7, from anywhere with an internet connection and using the recommended browser.
