

# CROWN<sup>®</sup> SCHOOL LOCKERS

Quality wooden lockers  
for independent schools,  
colleges and universities  
across the UK

## A WELCOME MESSAGE FROM THE DIRECTORS

### School Locker Specialists

Crown School Lockers is a division of Crown Sports Lockers (UK) Ltd. Our company has been designing, manufacturing and installing durable and robust wooden lockers for over 30 years. Initially, we were both Project Managers at Crown Sports Lockers, before taking over as Co-owners and Directors in 2020.

All wood is responsibly sourced, and manufacturing takes place at our premises in Devon. Carrying the 'Made in Britain' mark, Crown School Lockers' products go through stringent quality assurance checks, are manufactured to the highest standards, and fitted by our own skilled installers, who pay attention to detail – leaving you with wooden lockers to be proud of, for years to come.

# SCHOOL LOCKERS FOR ALL EDUCATIONAL NEEDS

# INDEPENDENT SCHOOLS WE HAVE WORKED WITH

---

These are a selection of the prestigious independent schools & colleges we have been privileged to work with.

Crown School Lockers have manufactured wooden lockers and solutions for a great number of highly regarded independent schools – many of whom have retained our services over the years for multiple phases of renovations.

## DESIGN

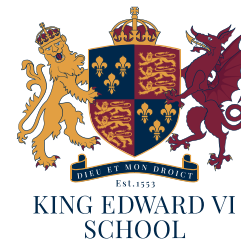

You will be assigned a Project Manager to liaise with you from initial contact, through to the end of the job. We will design your lockers, either to a standard design, or completely bespoke.

## MANUFACTURING

Our wood is sourced locally and responsibly, and we carry out manufacture on our premises, giving us full control over quality assurance. Crown School Lockers are 'Made in Britain' accredited.

## INSTALLATION

Your lockers will be installed by our experienced team of skilled installers. They pay attention to the finer details, and will ensure your lockers and additional products are to your satisfaction.

## CLASSROOM LOCKERS & CLOAKROOM LOCKERS

---

Classroom lockers play a practical and functional role in education. Classrooms should be safe, secure and clutter-free environments to help promote quality engagement, in a calming atmosphere conducive to learning.

Cloakroom lockers are essential – especially in the winter months when coats, hats and scarves need to be stored safely and away from the classroom. Usually located in hallways and corridors, cloakroom lockers can also be utilised to store other personal effects during the academic day.

We design, manufacture and install quality, wooden school lockers to accommodate the needs of pupils/students, their clothing and equipment. Secure lockers are paramount in order to reduce the risk of theft or damage to personal property. Health and Safety requires thoroughfares to be kept clear of clutter, making our lockers the ideal solution.

## GYM CHANGING ROOMS

---

Gym changing rooms in schools, colleges and universities are always a hive of activity – and often the main area in which uniform and personal possessions are mislaid/stolen or damaged. Health and Safety is also an issue in these areas, especially if water is present in the form of showers/ swimming pools.

Crown School Lockers can provide secure wooden lockers to help keep changing rooms safe and free from clutter. We can also provide waterproof lockers with antibacterial properties, making our antibacterial lockers the ideal choice for anything from football boots to swimwear. Bench seating can either be integrated as locker bench seating, or free standing, and is available in a variety of finishes and colours, from laminated timber and solid surfaces to upholstered.

For larger gym changing rooms, we can design and manufacture wet room and dry area washroom solutions. Please contact us for further information, or to discuss the suitability for your school, academy, college or university.

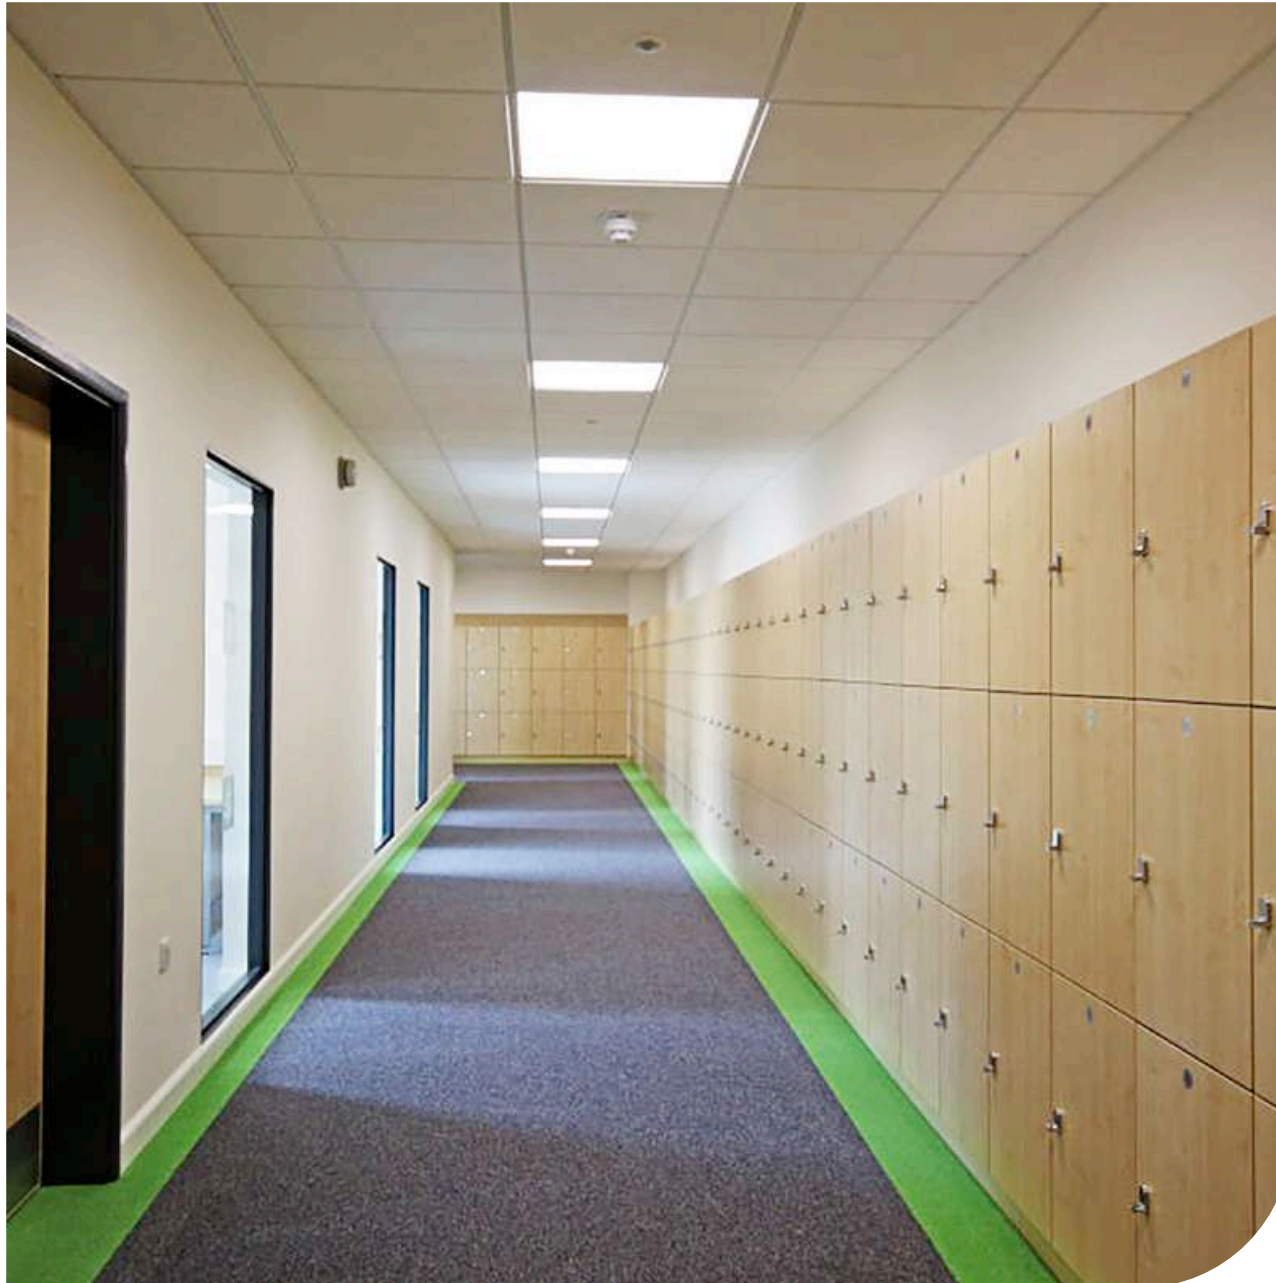

## PRIMARY SCHOOL LOCKERS

---

Primary schools generally require low lockers to facilitate access by the smallest of pupils. Lockers for primary schools serve many purposes, and can play an integral part in the early years of education. Children learn through repetitive actions and watching others. Teaching them to be responsible for their belongings, along with being able to independently access resources throughout the day - whilst they are young and receptive - can help to set them on the correct path for later life.

We understand that any furniture purchased for schools needs to be able to withstand constant use. This is why our lockers are manufactured to be sturdy, and are furnished with robust hinges, mounted on cast plates with 2-way adjustments and 2mm thick locking plates.

## INDEPENDENT SECONDARY SCHOOLS & ACADEMY LOCKERS

---

Lockers for schools serve both a functional and practical use in secondary schools and academies. Often navigating large buildings and numerous staircases, students travel from class to class and therefore need to carry the necessary equipment and books with them throughout the day. Textbooks and exercise books, combined with sports kit and lunches etc., can take a toll on young people, causing back pain and possible tripping/falling on stairs. Wooden school lockers can help to avoid these issues, allowing students to securely store these items until required for specific lessons.

Security can be a major issue in schools, especially with the increase of expensive technology, such as mobile phones, tablets and laptops etc. Lockers can help by reducing incidents of theft and/or damage to personal property in addition to instilling a sense of responsibility and trust in students.

## STUDENT LOCKERS FOR COLLEGES & UNIVERSITIES

---

Students and mature students have a requirement for secure storage in the form of student lockers, as they are likely to be in possession of valuable items such as car keys/laptops and purses/wallets etc.

In busy environments such as these, possessions are better being securely locked up rather than being in pockets, to avoid theft or loss. In addition to this, textbooks can be rather hefty and cumbersome to carry around campus all day. For the sporty student, a locker is vital to store gym kit and towels etc., in order to keep classrooms and lecture rooms hygienic and free from tripping.

## A SELECTION OF TESTIMONIALS FROM INDEPENDENT SCHOOLS

“ Choose a supplier whose install team can run the project smoothly, efficiently and with minimal disruption. Crown have been exceptional in that capacity.”

**Adrian Charlesworth**  
Nottingham High School

“ We had two changing rooms totally fitted out with new lockers and we could not be happier. Sam was outstanding in helping us choose the right colours, design and tailored to our needs, and the price was excellent. The team arrived on time, got all the work done as forecast and the finish was superb. We are having them back to install lockers in two other areas of the school this summer and they are definitely our company of choice.”

**Ken Brockless**  
Bursar, Davenies Boys Prep School, Buckinghamshire

“ The standout choice. We had asked suppliers for the same look as before, but with a fresh approach. Only Crown offered a different take. Project Manager, Spencer Grimwood, thought outside of the box.”

**Laurence Gully**  
UWE Centre For Sport

“ We contacted Crown Sports Lockers (UK) Ltd early in 2024, as we were due to have a new sports hall built at our school. They designed and fitted lockers and seating for us a few years ago, so we were aware of the quality of their work. Yet again, Crown have delivered on a sizeable project, expertly manufacturing, and installing open lockers and bespoke island seating to our requirements, across 8 changing rooms.

The quality of the products and the installation have been finished to their usual high standards, and I would not hesitate in recommending the professional service we received from Sam and the team at Crown.”

**P. Sargent**  
Estates Director, Valley Invicta Academies Trust, Maidstone

## CASE STUDY: KING EDWARD VI SCHOOL IN HAMPSHIRE

Reputable, Independent Co-Education for Students 11-18 Years.

### PROJECT OVERVIEW

King Edward VI School was originally opened in 1554. It is now a leading Independent Day School in Hampshire, with a reputation for outstanding academic results.

### WINNING THE CONTRACT

Sam Palmer, a Director and Co-owner of Crown School Lockers stated “King Edward VI School found us through an online search. The initial telephone enquiry led to us arranging a site meeting to discuss their requirements, and review the areas where the wooden school lockers were to be situated. The first draft of layouts were drawn up, and the quotation finalised. However, the initial plans were revised, and changed earlier this year to concentrate on a different area of the school. We amended the details, eventually commencing manufacturing and installing the lockers in summer 2023 as requested.”

### THE INSTALLATION AT KING EDWARD VI SCHOOL

The installation process was undertaken by a team of Crown School Lockers' competent fitters, taking all of the client's requirements into consideration. Sam confirmed “We were commissioned to provide 204 holdall lockers, each with an internal shelf for the student's ring binders. For each bank of 6 holdall lockers, we supplied a hockey stick unit in a matching finish. Locker interiors and décor panels were in a plain black finish, with contrasting oak-effect doors, finished with plywood effect edges. Lockers were fitted with padlock attachments and red & white discs with white text. Locker doors were fitted using a bolt-through hinge system for added peace of mind.

“ Crown Sports Lockers have provided a professional service, with accurate site assessments, concept drawings and final proofs. The initial enquiries were dealt with efficiently and despite our protracted procurement process, they remained focused on the project throughout. Sam and his team accommodated our requests, until our ideal bespoke lockers were installed over the summer. We are delighted with the finished results and look forward to working with them in the near future.”
