

Ibstock Place School Network Infrastructure Upgrade

Ibstock Place School needed to widen their network infrastructure.

THE CHALLENGE

Robert Gorrie, Director of Innovation and Strategic Projects at Ibstock Place School, outlined problems with limited network reach within their sites with the school working predominantly within dedicated IT rooms.

Consequently, the return of pupils after the Covid-19 pandemic left the school with a restricted reach of technology within their services with the right power, data and Wi-Fi signals.

"We found working with inTEC a really seamless experience and we've been able to do a lot in a really short space of time".

Robert Gorrie – Director of Innovation and Strategic Projects

"We worked in partnership with the team at Ibstock Place School to upgrade the infrastructure and systems, ensuring they would effortlessly cope with the post-covid classroom and the increased demands of a new one-to-one pupil device scheme. We then took responsibility to supply and deploy the first phase of Microsoft Surfaces for pupils, which went seamlessly."

CO-EDUCATIONAL DAY SCHOOL

TECHNOLOGY AUDIT

Comprehensive review of IT and learning environments with a detailed report to plan and budget upgrades.

SOLID FOUNDATIONS

Upgrade the school's technology infrastructure to staff and pupils work in a robust and secure environment.

SETTING EXPECTATIONS

Managed service ensures fit for purpose, future proofed technology to deliver enriched learning experience.

HOW WE DID IT

inTEC Education carried out a network infrastructure audit which consisted of a Wi-Fi survey. This survey mapped out areas of the campus which were most suited to technology and areas which required investment to improve. From this audit, the school could liberalise ways to incorporate technology across the whole campus.

These services have allowed Ibstock Place School to exploit advanced project work for their staff and pupils. The development of their Innovation Centre offers pupils the space and resources such as a green screen area, interactive displays and a podcast studio. inTEC supports the school with these programs and is working to roll out a pupil 1-to-1 scheme.

"We can be certain that it will work, it will be delivered on the timelines that we set and we can trust that it will be the right solution for our pupils and our staff".

Robert Gorrie – Director of Innovation and Strategic Projects
