

Bespoke modular eco-buildings that won't cost the earth

biophilic
by nature

 **TG ESCAPES**
modular eco-buildings

“They understood our needs and produced a design that we knew would meet those needs, amazing.”

**TG Escapes Ltd. started in 2003 with The Garden Escape - founded by Richard and Kath Harvey
in partnership with Metropolis Architecture.**

Contemporary garden offices built from sustainable materials to encourage people to work from home. Because if more people worked from home, they would spend less time travelling to work, expend less energy and have a better quality of life.

The space you are in has a huge impact on how you work and learn, so a stylish building with large windows, sun pipes, and sedum roof provides an inspiring space that is friendly to the environment.

Realising that the same approach could provide unique learning environments for schools, encouraging environmental citizenship, and provide inspiring spaces for businesses, the team is now more than 40 strong and soon to celebrate their 20th anniversary.

Versatile net-zero buildings designed for your space can grow as you do, with features like sun pipes, living sedum roofs, solar PV as well as AA rated cooling & heating.

Our bespoke designs connect the inside to out providing external views of nature. We use natural materials and ensure consistent working temperatures, optimum air quality, ventilation and acoustic comfort, and we maximise the available natural light.

Our Learning Escapes can be seen in all educational settings from early years through to higher education used for classrooms, staff rooms, chapels, teacher training, nurseries & early years, school halls, sports pavilions, SEND and disabilities, studios and two storey multi use provision.

Two classroom buildings can be constructed in as little as six weeks onsite

Our Commercial Escapes are used for offices, sports pavilions, hospital relative rooms, VIP reception centres, kiosks, accommodation blocks and changing facilities.

Larger buildings can cost as little as £1600 per m²

Our modular approach minimises disruption on site and helps to maintain continuity of use throughout a project.

It also saves time and money compared to a traditional build.

“

“The buildings have a very ‘tranquil’ feel to them.”

”

“

“The most common reaction when a new family enters the building is “WOW!”

”

“

“Very positive impact on staff wellbeing.”

”

We handle the whole proposal from start to finish.

It couldn't be easier with full bespoke design and project management in a one stop shop.
We make it a point to include absolutely everything in the project proposal.

Planning permission / building regulations • Demolition if required • Design and architecture • Ground preparation
Foundations Construction • Flooring • Water and electricity • Bathrooms and washrooms
Plastering • Painting and decorating

We have an experienced team who understand the sensitive requirements of your busy day. With TG Escapes there is one fully transparent, all in price ensuring cost certainty for the complete delivery of the project.

Every eco-building comes with 10 years' warranty on the main structure, 20 years' warranty on the roof and 12 months manufacturer's warranty for the fixtures and fittings within the building.

We're always available if you have after-care or repair requirements and will be happy to discuss a long-term maintenance plan, any future developments or change of usage.

“From design and planning through to construction TG escapes were fantastic to deal with.”

“We were impressed with the solid construction, finish, adaptability and simple lines.”

“I found everyone I spoke to was really helpful and seemed determined to make our project work. They were also happy to work within our very tight budget so I really felt we were getting value for money.”

It is our mission to create bespoke, turnkey, net-zero timber frame buildings that connect to nature and inspire.

Our values

- Stay safe
- People and planet first
- Deliver all we promise
- Good enough is not enough
- We are family

Our Credentials
