

Examples of ReEnergise Project Work for Schools & Colleges

A selection from our current and recent work in the past 4 years
(the list is not exhaustive)

Department for Education

- Technical and commercial advice for planning a programme of heat decarbonisation plans for 200 schools around England.

Aysgarth School (N Yorks)

- Heat decarbonisation strategy and plan.
- Heat metering and monitoring now underway as part of the project definition for a heating plant conversion project, likely to be based on a GSHP district heating system.

Beaudesert Park School (Gloucestershire)

- Estate decarbonisation plan under development.

Buckinghamshire Community Energy (Bucks)

- Heat and power decarbonisation study for a campus area in Wendover comprising several schools and other buildings.

Diocese of Guildford (Surrey)

- Technical support for grant applications for provision of decarbonisation plans for the Diocese schools.
- Decarbonisation plans developed for most of the Diocese schools (41 schools).
- Preparing to manage a programme of projects to convert the heating of 21 schools over the next 2 years.

Dulwich College (London)

- Heat decarbonisation strategy and plan.
- Project definition studies and full designs completed for conversion of estate into 4 GSHP district heat networks (3MW+ in total).

Edgeborough School (Surrey)

- Estate decarbonisation plan.
- Energy efficiency audit.

Felsted (Essex)

- Estate decarbonisation plan under development.

Haileybury (Herts)

- Net-zero programme and estate decarbonisation plan under development.

Horris Hill School (Berks)

- Estate decarbonisation plan under development.

Kingston Maurward Agricultural College (Dorset)

- Heat decarbonisation strategy and plan.
- Management Contractor for a major GSHP district heating scheme to convert much of the college estate to low-carbon heating.

Lady Eleanor Holles (London)

- Outline estate decarbonisation plan developed.
- Project definition underway for a heating plant conversion project, including heat metering.
- Advice on low-carbon systems integration for the development of a new 6th Form Centre.

Methodist Independent Schools Trust

- Development of net-zero framework strategy for the Group.
- Estate decarbonisation plans under development for the Group's 13 school estates around England.

Examples of ReEnergise Project Work for Schools & Colleges

A selection from our current and recent work in the past 4 years
(the list is not exhaustive)

Royal Alexandra & Albert School (Surrey)

- Heat decarbonisation strategy and plan.
- Project definition studies and project manager for the ensuing GSHP installation programme. This is the largest recent school related GSHP project in the Southeast region of England (2MW+).
- Project manager for the major power supply and electrical infrastructure upgrade also required to enable the heat pumps to work.

Rugby School Group (Warwickshire)

- Estate decarbonisation strategy under development for the Group's two schools.

St George's College, Weybridge (Surrey)

- Decarbonisation strategy and plan for senior and junior campuses.
- Project definition studies for resultant GSHP projects.

- Management Contractor for tendering and installation phases for senior campus project; (the junior campus project has not yet proceeded).

St Lawrence College, Ramsgate (Kent)

- Scoping, planning and project management of a major on-site power generation project underway.

Stowe School Group (Bucks)

- Estate decarbonisation plans under development for the Group's 3 school estates.

Worth School & Abbey (West Sussex)

- Heat decarbonisation strategy and plan.
- Project definition, tendering, and extended contract negotiations for installation of a large biomass district heating system (1.6MW) that will get the estate off fossil fuel heating (mainly oil).
- Project Manager and Engineer for installation phase of the biomass project.
