THE REVOLUTIONARY DIGITAL REGISTRATION SYSTEM FOR YOUR SCHOOL

"

WE WERE LOOKING FOR A BETTER WAY TO TRACK SIXTH FORM ATTENDANCE IN STUDY SESSIONS, TO REPLACE OUR MANUAL REGISTRATION PROCESS. **WITH INVENTRY'S LESSONSCAN, STUDENTS CAN NOW EASILY SCAN THEMSELVES INTO THEIR STUDY PERIOD WHILST FREEING UP HEAPS OF ADMIN TIME FOR STAFF. IT'S BEEN A GREAT ADDITION!**

Alex Birks-Agnew, Senior Assistant Head, Trinity School Sevenoaks

WELCOME TO INVENTRY'S REGISTRATION SOLUTIONS

With our digital registration solutions, outdated paper systems are a thing of the past so you can safeguard your students during and out of school hours, all while complying with data protections laws.

Designed to provide safe and secure digital registration for classrooms, school clubs and higher education, our solutions enable you to accurately track student attendance, with marks written back to your MIS for improved efficiency.

SELF REGISTRATION FOR PUPILS

MIS INTEGRATED
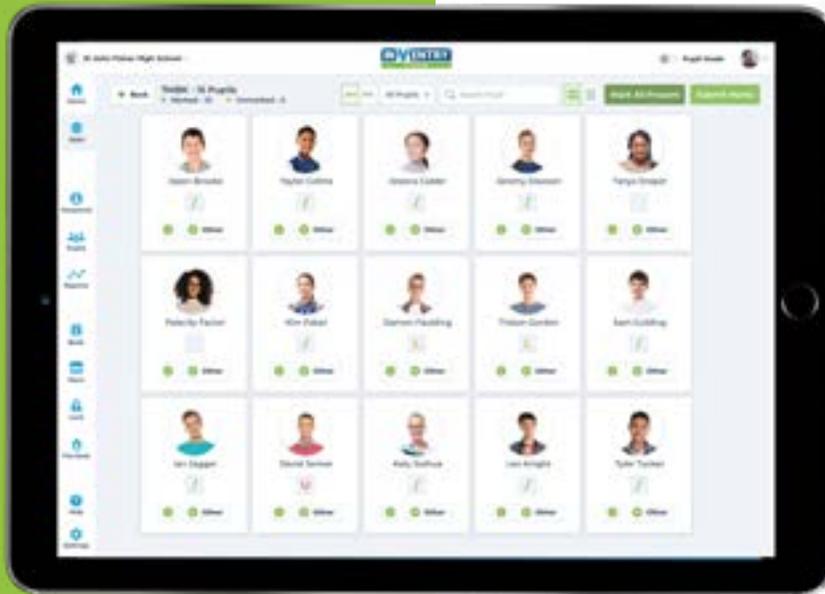

PHOTO IDENTIFICATION

USE ON ANY DEVICE

CLASSMARK CLOUD

ClassMark Cloud simplifies the registration process; making it easier than ever to keep track of your pupils. The software has been developed so it links straight to your MIS, allowing your school to take a register in as little as 3 clicks! You'll never be without the key information you require to ensure all students are present and correct.

InVentry Cloud Integration
Each register is written directly back to your MIS, ensuring accuracy and efficiency of your registration records.

Web Based
Network interconnectivity is not needed to access ClassMark Cloud, meaning all you need to access the system is a web browser and some form of cellular or WIFI connection.

Pupil Registration
Give students a new level of independence by allowing them to sign themselves in via Pupil Mode.

Easily Accessible
Whether you're using a laptop, PC, an Interactive Whiteboard or a tablet device, you can access registers via a 4-digit pin number, meaning the system has never been easier to use.

Evacuation
your school's registers link seamlessly to our InVentry Anywhere App, meaning your MIS evacuation lists are constantly live, and up to date.

All Pupil Register
Have the power to take your portable device out to a late school bus and sign pupils in at the school gates via our reductive search tool, minimising groups of pupils waiting in reception.

CLUBREG CLOUD

Although schools regularly look to improve security and functionality of their sign-in and registration system, all too often breakfast, and after-school clubs can be overlooked. With InVentry's ClubReg Cloud, staff leading extracurricular activities are provided with a digital registration system which ensures the safeguarding of pupils at all times.

Web Based
Easily access ClubReg Cloud on most devices through your web browser.

Self Registration
Enable your students to complete their own sign-in process, freeing your staff up to attend to other tasks.

Evacuation
Access complete registers for your entire school in real time across multiple devices when completing any type of evacuation.

Safeguard your Pupils
Quickly and easily create clubs whilst ensuring the safeguarding of children out of hours is maintained.

Secure
With seamless integration with the InVentry Anywhere App, staff can easily see which students are still onsite.

Club Attendance
Secure digital registration for school clubs, enabling you to accurately track student participation whilst ensuring outdated paper registration systems are a thing of the past.

LESSONSCAN

This comprehensive technology has been developed so it links straight to your SIMS MIS system, allowing your students to sign into their lesson with a single swipe of an ID card.

Perfect for Sixth Forms, Lessonscan saves on admin time and enables you to set the times in which students can sign in. Schools can add late messages and have multiple lessons linked directly to one Quickscan unit.

Student Registration
Give your students a new level of independence by allowing them to sign into their lessons and study sessions via our Quickscan Touch units.

MIS Integration
Each student sign in is written directly back to your SIMS MIS system; with even more MIS integrations coming soon!

Admin Control
Control the number of minutes early or late a student can sign into their lesson.

Simple Setup
Lessonscan can be installed on any existing Quickscan units you already have in place around your school.

Multiple Locations
Select which classrooms you would like associated with which Quickscan Touch unit.

Track Attendance
Have the ability to set the time in which a student will be deemed as late to class.

CASE STUDY
TRINITY SCHOOL SEVENOAKS

InVentry Helps Trinity School Sevenoaks to Easily Track the Attendance of their Sixth Form Students Whilst Saving Heaps of Admin Time with Lessonscan.

THE CHALLENGE

With the expansion of their Sixth Form department, Trinity School Sevenoaks were looking for a solution that would save admin time and enable them to no longer have to manually track their higher student's attendance. As study sessions are compulsory for their Sixth Form students, the school also needed an accurate record of their presence.

THE SOLUTION

With an InVentry sign in system already in place, Trinity School Sevenoaks jumped at the chance to see Lessonscan in action when their Sixth Form significantly grew.

With the installation of our Quickscan Touch outside their Study Centre, Sixth Form students have been given a new level of independence by being able to easily sign in and out of sessions. Giving teachers peace of mind that their attendance is accurately recorded and pulled directly through to their SIMS Management Information System (MIS).

Alex Birks-Agnew, Senior Assistant Head said "our Sixth Form department has recently grown in size, meaning there's a lot of students who we need to account study time for. We wanted to be able to properly track attendance at study lessons for Sixth Form students as they have some flexibility about where they can study in the building, and we were struggling with the ever-growing workload of manually registering every pupil. With Lessonscan, students can not only easily scan themselves into their study period, but it's freed up heaps of admin time for the staff too. It's been a great addition!"

> **AS SIXTH FORM STUDENTS HAVE A HIGHER LEVEL OF INDEPENDENCE THAN THE REST OF OUR PUPILS, IT WAS DIFFICULT TO TRACK WHETHER OR NOT THEY WERE ATTENDING THEIR STUDY SESSIONS. NOW STUDENTS WILL USE THE MAIN INVENTRY SIGN IN SYSTEM TO SIGN IN ON A MORNING, AND THEN USE LESSONSCAN TO MARK THEMSELVES AS PRESENT AT THE STUDY CENTRE – IT'S ELIMINATED ANY RISKS FROM MANUAL ERRORS.**
