

**How U4L can help
your school go green
& save money**

Who we are

We're a full-service energy consultancy.

We specialise in finding businesses and schools better rates for their utilities.

We also provide additional support to save you more time and money while helping you go green.

As a small team of energy specialists, we deliver an expert service with a distinct personal touch.

What we can do for your school

Just some of the ways we can help your school save time and money, and reduce your emissions.

✓ **Utility procurement & management**

We manage your entire gas, electricity and water procurement processes, saving you time while bringing you the best rates on the market.

✓ **Bill validation**

Our account managers regularly review your energy bills against current rates and consumption to ensure you're not being overcharged.

✓ **Energy efficiency solutions**

Our team will assess your school and recommend the best energy efficient swaps. We'll then implement and report on the changes.

✓ **Compliance services**

We help your school stay compliant with the Energy Savings Opportunity Scheme (ESOS) and the Streamlined Energy & Carbon Reporting framework (SECR).

✓ **Renewable energy solutions**

From solar panels to renewable heating systems, we have a variety of clever, cost-effective ways to help your school switch to renewable energy.

✓ **Electric vehicle charging points**

If you'd like to further showcase your green efforts, we can install EV charging points - and we'll take care of the entire end-to-end process for you.

Don't just take our word for it...

Here's how we've helped other schools like yours.

"Jade and Matt at U4L have been **absolutely brilliant in providing a great service** as I've had to negotiate the gas providers minefield that is the current energy market.

They sought some really good deals, **had the best interests of the school at heart**, and went out of their way to help with the transfer from current energy providers.

In addition, they found a new water retailer who has proven far better than our previous retailer. I highly recommend U4L for their **friendly, professional and knowledgeable advice.**"

Faye Martin

Registrar and Office Manager | London Christian School

"We wanted to partner with a business that didn't just focus on energy, but also **shared our sustainability values**. U4L has filled this role perfectly.

Not only have we now switched over to renewable energy, but U4L has introduced us to other ideas and solutions which will **help us reduce our energy usage** across the whole organisation."

Paul Lamb

Director of Finance | Oundle School
